**Veterinary Consultancy Practices.**

“Veterinary consultancy practice” means the premises, with access to animals, and wherein only clinical examination and treatments are carried out. If minor surgery is carried out, this shall not include the opening of body cavities. In this type of veterinary practice, a veterinary surgeon exercises his profession in an individual and personal form. More than one veterinary surgeon may form part of this consultancy practice by sharing the premises, equipment and, or staff, but retaining their fiscal and professional individuality; [S.L.437.106].

| Veterinary Consultancy Practice |   | Licence number | Licensee                 | Address   |
